**Onyx-Technica JV supports
DISA-provided networks
and infrastructure on a
global basis.**

SERVICES INCLUDE

- Telecommunications
- Network Engineering
- Service Transition and Implementation
- Special Ordering Situations
- ITIL-Derived Technical Support

ONYX-TECHNICA JV is a Mentor Protégé Joint Venture (JV) based on a Small Business Administration (SBA)-approved Mentor Protégé Agreement between Onyx Consulting Services LLC (the Protégé) and Technica Corporation (the Mentor). Onyx-Technica JV has assembled a team made up of both large and small businesses that, when combined, have over 110 years of experience providing IT solutions to the Federal Government. This experience provides the depth and breadth of understanding, along with the scope necessary, to support DISA-provided networks and infrastructure on a global basis. Their combined knowledge is applied to the engineering of DISA-provided GIG services capabilities worldwide.

OUR TEAM

The Onyx-Technica JV team brings together some of the leading telecommunications and networking providers, premier research and development laboratories, and hardware and software integrators with commercial best practices as well thousands of patents for hardware, software, and processes. With globally recognized certifications the team is well positioned to serve the Department of Defense with the support necessary to carry out required engineering, transition and implementation, integration, connection approval, and information technology service management (ITSM) activities, in support of existing and future DISN networking capabilities.

DISA GSM-ETI

Onyx-Technica JV is one of the awardees of the Global Information Grid Services Management - Engineering, Transition and Implementation (GSM-ETI) contract. Through this Multiple Award Indefinite Delivery, Indefinite Quantity (IDIQ) contract, Onyx-Technica JV will provide labor and equipment for the engineering, transition, and implementation needs of the Defense Information Systems Network (DISN) and related Global Information Grid (GIG) capabilities and services. The DISA GSM-ETI contracts have a worldwide scope and an estimated combined ceiling value of \$1.42 billion over the five-year period of performance if all option years are exercised.
