

STOR #8 SME Engineering Support

Technica supplies Subject Matter Expertise (SME) to support of a wide variety FBI Information Technology Branch (ITB) initiatives. The Technica STOR 8 task order allows all ITB divisions, sections and units to easily acquire the SME support they need. The task order is flexible allowing the addition of required SME skills to fulfill FBI requirements as they evolve. Technica supports the full FBI Engineering Lifecycle, including system concept exploration, planning, requirements analysis, design, development, testing, implementation and support. The STOR 8 SME Engineering Support task order offers the FBI a holistic vehicle to support the FBI ITB environment and mission.

Technica FBI IT Triple S Team

Technica has assembled a team of capable large and small businesses to support the FBI IT Triple S BPA. The Team has proven past performance in all areas of the FBI IT Triple S scope, along with a history of providing outstanding customer service at the FBI. Our SME Team is constantly evolving to meet FBI ITB requirements. We can quickly add vendors and subcontractors as needed to meet FBI mission goals.

The Team's core capabilities include:

- Big Data Solutions
- Cloud Services Architecture and Engineering
- Cyber and Digital Forensics
- Enterprise Application Integration
- Enterprise Architecture Development
- Enterprise Management Systems
- Information Assurance
- Mobile Solutions Engineering
- Network and Systems Engineering
- Process Engineering
- Service Oriented Architecture
- Software Development
- Technical Project Management
- Testing, Evaluation and IV&V
- Virtualization

FBI IT TRIPLE

STOR #8 TASK ORDER INFORMATION

Full Title:

ITED Subject Matter Expert Engineering Support

Contract Reference:

ITSSS STOR8

Period of Performance:

Base Year + 4 Option Years
(09/12/2011–09/11/2016)

Ceiling Value:

\$59M (estimated)

STOR #8 SME Engineering Support

Goals:

- Support ITB tasks associated with the delivery of engineering products into the FBI enterprise.
- Deliver cost efficient, reliable, scalable, and secure solutions by leveraging industry best practices and technology frameworks.
- Satisfy mission objectives, support dynamic initiatives, and leverage evolving technologies by providing essential technology and product knowledge.

Technical Support:

- SMEs function as technology experts, ready to support any projects, issues, or questions FBI stakeholders may have concerning the SME's particular vendor or technology.
- Provide assessment, engineering, and product integration for a variety of manufacturers and suppliers.
- Provide end-user support, leveraging reach-back to their corporate OEM resources including helpdesks, technical libraries, and other engineers.
- Support solutions for all FBI network enclaves.

- Support all stages of the FBI engineering lifecycle, from solution exploration and requirements development, to evaluation, testing and implementation.

Results:

- Enterprise Remote Access Service (ERAS) secure laptop engineering and deployment support.
- Mobility Program Office mobile phone engineering and deployment support.
- Centralized Tiered Storage (CTS) engineering and deployment support.
- Next Generation Special Compartmented Information Operational Network (NGS) engineering.
- VMware vCloud design for IaaS and DOJ consolidation.
- Network Circuit Consolidation (ECC) architecture and engineering support.
- VMware ESX and vCenter product deployment and support on UNet and SCION.
- Citrix implementation support including Windows operating system hardening and optimization, Active Directory integration including GPO implementation, thin client device integration.

Some of our STOR #8 vendors include:

- | | | |
|------------|-------------------|--------------|
| ■ Activu | ■ F5 | ■ Raytheon |
| ■ BAE | ■ Hewlett-Packard | ■ RSA |
| ■ BigFix | ■ IBM | ■ Sourcefire |
| ■ BlueCat | ■ iDirect | ■ Sun/Oracle |
| ■ BlueCoat | ■ Juniper | ■ Tandberg |
| ■ Brocade | ■ Microsoft | ■ VBrick |
| ■ Citrix | ■ NetApp | ■ Verizon |
| ■ Dell | ■ OPNET/Riverbed | ■ VMware |
| ■ EMC | ■ Oracle | |
| ■ Entrust | ■ Polycom | |

Additional vendors are added to the STOR 8 SME contract at the customer's request.
