

Customer Focused, Solutions Driven

Technica has been providing technology integration, professional services, products, and innovative technology solutions to defense, intelligence, law enforcement, and civilian agencies since 1991. We specialize in network operations and infrastructure; cyber defense and security; government application integration; software development and support; systems engineering and training; and product deployment planning, and support. Our research and development department provides customer-tailored, budget-sensitive solutions in emerging technologies such as big data analytics. As an experienced systems integrator, we serve as a trusted advisor to help you navigate the often complex government buying process and procure the services your agency needs.

CONTRACT VEHICLES

Our qualified government customers have access to a range of contracts:

Ready to Serve

We are dedicated to providing high-end technical expertise, experienced program management and reliable IT solutions to the satisfaction of our customers. You can count on our team of engineers to work with you to determine the best solution possible to help your mission succeed. We pride ourselves on being innovative problem solvers who strive to put our customers' needs first.

We are an agile company that can staff an assignment quickly. We have assembled a broad team of companies and suppliers to support us and will recommend solutions that are vendor agnostic and can be customized to suit your needs. Our past performance experience and range of technical certifications gives us the ability to understand your requirements and suggest the best range of products and services to help you achieve your missions' goals.

Supporting Our Customers

We have worked for many different agencies since our founding, and served as a trusted advisor as we provide innovative technology solutions. Our Project Management Organization is dedicated to the goal that our customers' project requirements will be completed and delivered to their satisfaction. Using a CMMI

quality approach and auditing procedures, we help meet and maintain project standards. We hold several contract vehicles that make it easy to work with us and attend government tradeshow and conferences across the country so that we can speak to our customers face-to-face.

We strive to build and sustain strong partnerships with our customers based on trust and confidence. And we respond to their needs quickly with a "can do" attitude—always delivering on our commitments. Finally, we support our customers' success by being flexible, easy to do business with and accountable.

Providing Innovative Engineering Services

Engineering is at the core of our company. Two engineers founded Technica, and still run it today. Whether your requirements are for systems engineering, software development, information assurance or cloud computing, we combine comprehensive knowledge of industry technologies and project management with a commitment to quality. We are dedicated to providing pragmatic, holistic approaches to problem solving that are nimble enough to respond to ever-changing environments.

Delivering Unbiased Product Solutions

Our customers and partners know us as an integrator who solves complex problems and delivers advanced IT solutions to U.S. federal agencies. We continuously evaluate emerging products and technologies to consistently deliver exceptional professional services with best-in-class IT solutions.

Our Product Solutions team is dedicated to satisfying our customers during every step of the procurement process from solution identification, to delivery and installation, and on-going support. We maintain close relationships with our manufacturing partners and keep our customers informed throughout the acquisition process. And we hold manufacturer certifications for each product we support.

OUR CAPABILITIES

Global Network Operations

- Cloud Computing Integration Services
- Platform as a Service
- Software as a Service

Cyber Defense and Security

- Independent Verification and Validation
- Network Security Engineering
- Privilege Management
- Security Test and Evaluation

Government Application Integration

- Enterprise Application Integration
- Ozone Widget Framework
- Situational Awareness
- Virtualization Systems

Product Research, Development, Test and Evaluation

Systems Engineering, Training, and Support

- Business Process Reengineering/ITIL v3
- Data Center Optimization
- Enterprise Architecture
- Network Engineering
- Network Transport Technologies

Product Implementation and Support

- Data, Networking, and NetCentric Solutions
- Enterprise Software Solutions
- Security Solutions
- Unified Communications

Our Commitment to Quality

Quality has been a pillar of our company since the earliest days of our founding. Whether it concerns process, project requirements, or change management the importance of quality is stressed continuously. The satisfaction of our customers is extremely important to us, so we communicate and collaborate with them throughout the project lifecycle. From hardware and software delivery to the most comprehensive Networking and Information Assurance solutions, we consistently seek out ways to ensure we fully meet their requirements.

Teaming for Quality Standards

We pursue best business policies and practices to deliver the highest quality solutions to our customers. We are evaluated at CMMI Level 2 and continually look for ways to further our quality standards.

Customer Feedback

We routinely communicate with our customers using a variety of methods and seek feedback throughout the delivery of a project. We carefully analyze customer input so we may improve our business practices serving them.

Education and Training

We provide internal technology training on our projects to ensure our engineers maximize the use of their skills and abilities. We also pursue external training and certifications in areas that support our engineering and solutions practices.

Hiring and Career Progression

We constantly search for the most qualified candidates to join the Technica team. Once they are on-board, we promote career growth through education and project experience. This allows our team to continue to expand its skills while supporting our customers.
