

## Cloud Computing Integration Services

Cloud computing represents an opportunity for your organization to spend less attention on your Information Technology (IT) and focus more on your business mission. Next generation multi-tenant hosting platforms, software defined data centers, and software defined networks offer opportunities to significantly increase efficiencies and agility through public, private, or hybrid cloud computing strategies.

### OUR CLOUD COMPUTING INTEGRATION SERVICES:

- Strategy and Design
- Security Verification and Remediation
- Implementation
- Continuous Evolution and Sustainment

At Technica, we are dedicated to providing high-end technical expertise, experienced program management and reliable IT solutions for our Federal Government customers. You can count on our team of experienced, reliable engineers to work with you to determine the best Cloud solutions possible to help your mission succeed. We pride ourselves on being innovative problem solvers who strive to put our customers' needs first.

## Delivering Secure, Self-Service IT Infrastructure Solutions

We are committed to discovering and analyzing the latest technologies to help our customers succeed in their missions. This means we have a duty to not only keep up with current trends, but also to help invent them, or integrate them into meaningful solutions for our customers. Cloud computing is no exception. As the cloud computing industry matures, so too do the variety and volume of available cloud products and technologies.

Technica integrates commercial and open source virtualization solutions from a variety of industry-leading companies such as VMware, Red Hat, Hewlett-Packard, Microsoft, Splunk, Puppet Labs, and Apache. We will evaluate your IT and business requirements to select the best combination of enabling technologies for your cloud computing strategy with an emphasis on an open architecture that is standards-based, flexible, scalable, and avoids vendor lock-in.

Technica is your technology partner and trusted advisor for designing, developing, and executing your cloud computing strategy. We will assist with selecting and defining a cloud delivery model appropriate for your business mission, implementing the necessary technical, operations, and business infrastructure to deliver cloud services, and assist with migration and adoption execution.

### Leveraging cloud computing technologies and concepts with Technica at your side, you will be able to:

- Achieve greater levels of infrastructure utilization and elasticity through software defined data center and other virtualization technologies.
- Provide a richer end-user experience while reducing IT operating costs through self-service ordering, administration, and management utilities.
- Increase productivity through a more agile environment for developing and delivering mission applications.
- Provide more control and flexibility for end-users while maintaining a positive security posture through strong Information Assurance controls.

As an experienced systems integrator, Technica can help you navigate the often complex government buying process to procure the advanced cloud computing products and services your agency needs.
