

UNITED STATES AIR FORCE NETCENTS-2 NETOPS SMALL BUSINESS (SB)

The Network Centric Solutions-2 (NETCENTS-2) Network Operations and Infrastructure Solutions (NetOps) Small Business (NETCENTS-2 NetOps SB) contract vehicle will provide the Air Force (AF), Department of Defense (DoD) components, and other federal agencies with Network Management and Defense, Service Oriented Architecture (SOA) Infrastructure, Enterprise Level Security (ELS) Management, Implementation and Operations Support, and Telephony Infrastructure and Services in locations worldwide. Solutions and services provided under NETCENTS-2 will help DoD achieve information superiority and “full-spectrum dominance,” IAW Joint Vision 2020, and promote adherence to AF Enterprise Architecture.

SCOPE

Under the NETCENTS-2 NetOps SB contract, Technica will support network operations, core enterprise services, and infrastructure development and operations (including legacy telephony) as well as emerging SOA requirements. Our solutions will include implementation of Network-Centric Information Technology, Networking, and Security, Voice, Video and Data Communications, system solutions and services to satisfy the Combat Support (CS), Command and Control (C2), and Intelligence Reconnaissance and Surveillance (ISR) requirements for AF and other DoD components worldwide. We will meet or exceed DoD requirements to find, access, collaborate, fuse, display, manage, and store information on the DoD Information Network (DoDIN).

FEATURES

- Multiple award, Indefinite Delivery, Indefinite Quantity (IDIQ) contract vehicle
- Seven-year period of performance with a \$5.79 billion program ceiling
- Mandatory use for all AF network contracts
- Available to other DoD components and federal agencies
- Worldwide geographic scope

ADVANTAGES

- Pre-competited vehicle with 17 qualified prime contract holders
- Low cost - no fee for use of NETCENTS-2
- Flexible, decentralized access to Contracting Officers (CO)
- Fast competition through CO specified response times
- Uses standard contracting processes familiar to every CO

BENEFITS

- NetOps SB is available to Air Force, Army, Navy, other DoD components, and other Federal agencies with no fee to use this contract
- Technica qualifies as a Small Business Prime Contractor under this contract (contract provides small business credits to contracting entity)

CONTRACT NUMBER

- FA8732-14-D-0015

NAICS CODE

- 517311 - Wired Telecommunications Carriers

CEILING VALUE

- \$5.79 Billion

CONTACTS

- **Korey Blecher**
Netcents Program Manager
kblecher@technicacorp.com
334.207.4090
- **Marcy Dolan**
Deputy Program Manager
mdolan@technicacorp.com
334.207.4090

PERIOD OF PERFORMANCE

- The IDIQ has a three year base period and four one year option periods
- The IDIQ has a performance period up to ten years if all option periods are exercised
- Performance under individual task orders is limited to five years

CYBER INTEGRATION SOLUTIONS

- Network Management and Defense
- Network Transport Technologies
- Software Engineering
- Data Center Optimization
- Information Assurance (IA)

STRATEGIC OBJECTIVES

- Meet or exceed operational NetCentric requirements
- Ensure technical compliance with AF and DoD standards
- Easily include standards in task order contracts via NetOps PWS templates
- Meet or beat historical contract award timelines via agile task order awards
- Leverage USAF buying power to meet strategic sourcing goals and Better Business Power initiatives
- Provide AF Leadership insight into AF-wide IT requirements and spend data

TYPE OF WORK

The goal of this contract is to provide a full range of innovative, reasonably priced, world-class information technology services and solutions such as:

- Base Telephony Products and Services
- Network Command and Control
- Comm Squadron Operations and Local Network Helpdesk
- DoDIN Network Defense
- Managed Infrastructure Services
- Physical Infrastructure Maintenance and Upgrades
- Network Cybersecurity and Information Assurance Services
- Enterprise Network Helpdesk
- Backup, Disaster Recovery, Continuity of Operations (COOP)
- Creation of Testing or Training Network Environments
- Installation Notification and Warning System (INWS)
- Virtual Security System (VSS) Installation

THE TECHNICA NETCENTS-2 TEAM

The Technica NETCENTS-2 NetOps SB Team is composed of both large and small business defense contractors with complementary skill sets and resources to provide global support. Technica has teamed with AT&T (the largest US telecommunications provider), Boeing (the second-largest US defense contractor), and other small and large businesses with existing worldwide (OCONUS) infrastructure, logistics, and staffing capabilities to support NetOps requirements in any location, on-time and on-budget. Our team structure combines the niche expertise and agility of a small company with the reach-back and surge support capabilities of larger businesses.

When you choose Technica, you gain access to a team with in-depth capabilities to develop, integrate and operate network operations and cyber defense solutions on Air Force and DoD platforms, networks and installations worldwide. The team also features a robust small business component of companies who provide specialized and niche expertise important to the Air Force including:

- ADB Companies
- Alion Science and Technology Corporation
- IndraSoft
- Innovative Collaboration, Inc.
- Optivor Technologies, LLC
- Phantom Eagle
- SalientCRGT
- Secured Network Solutions, Inc. (SNS)
